- [root/evolution](#)

Debian trixie

naked

Just the juice, without GUI. You can start here to build your revolution!

colibri

A light xfce4 for developers you can easily start to improve eggs installing colibri.

penguins-court

A light xfce4 for developers with [boxes](#) for virtualization: you can grow up your ISOs inside it!

More informations:

- Repository: [penguins-eggs](#)
- Blog: [penguins-eggs](#)
- You can find more informations on this Linux distro at: [Debian](#).

Disclaim

Please note what this project is in no way connected to the original distro in any official way, it's just my personal experiment.
