## Penguins' eggs remastered ISOs

---

### user/password

---

- [live/evolution](#)
- [root/evolution](#)

## OpenSuSE

---

OpenSuSE needs no introduction, in “[Musica ribelle](#)” [Eugenio Finardi](#) sang about the “gates of the cosmos that are up in Germany”, it is still like that!

As with Fedora we are in our beginnings, but another door has opened, the gates of the cosmos!

The configurations for dracut are in the [dracut](#) folder.

Boot params for our ISO are created on [ovary.ts](#), this is a sample:

```
ppend initrd=/live/initrd-6.10.8-1-default root=live:CDLABEL=colibri  
rd.live.image rd.live.dir=/live rd.live.squashimg=filesystem.squashfs
```

It's now full functional, can be installed with `sudo eggs install -u`, the installed system can be customized and remastered again.
