Help need

I'm not too expert on RockyLinux, and in all the ways we have the follow problems:

- we don't have an rpm package at the moment, just install from source;w I'm not able to configure calamares;

You can mail me at piero.proietti@gmail.com, or on <https://github.com/pieroproietti/penguins-eggs>, <https://social.treehouse.systems/@artisan>.
